Lifetime warranty parts available only if customer can produce required manufacturer documentation. Typically this is 1) Proof of original owner such as sales receipt or warranty card 2) Proof of annual service. Some manufacturers now require warranty and annual service verification with them to obtain free warranty parts. Please contact Rec Tek at 702-266-7872 if you have any questions regarding your warranty status & required documentation to ensure you won't have to pay for parts if you don't have to.
